

Best Bath Systems

The UniFloor[®]

Commercial Grade
European Style Bathroom System

The UniFloor[®] from Best Bath

The UniFloor[®] System by Best Bath is a bathroom solution that integrates a one-piece floor and a wall system for a durable, spacious, and worry-free wet area for multiple applications. Featuring a commercial grade solid composite surface, this bathing system eliminates floor seams that might lead to costly water damage down the road. The **UniFloor[®] System** can be custom designed to project specifications, installs quickly and comes with a 30 year warranty. This ensures your facility continues to save you money year after year!

Benefits of the UniFloor[®] System:

Integrated shower provides an open space and larger turning radius for wheelchair user

Pre-engineered floor is sloped to the drain, with no mud setting required

Seamless floor flexes with building shifting or geological movement

Integral toilet base for easy placement and installation

Sprayable solid surface composite materials stand up to the rigors of high-traffic with reduced maintenance

Minimal threshold height at room transition

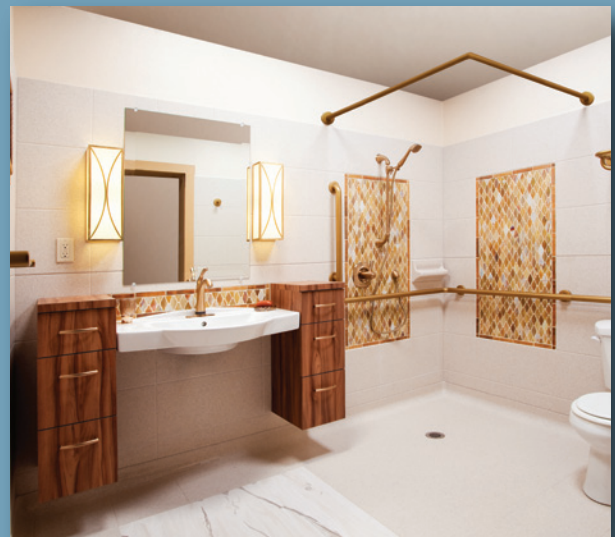

Designed for any application from ADA specifications, universal design to residential barrier free

**Innovative Solutions
Intelligent Choices**
